

Malting Barley Field Day

Wednesday, July 2, 2014

1 to 3 PM

1.5 DEC Pesticide Recertification Credits
approved for Categories: 1a, 10, or 21

Inverness Farm
Bob and Andy Crowe
113 Vandusenville Road
Canajoharie NY

Malting barley variety trials to see!
22 winter malting barley varieties
20 spring malting barley varieties
and a chance to see 20 oat varieties also planted on the farm

If you have interest in growing malting barley then you don't want to miss this field day. We will cover two of the most critical issues to successful malting barley production: variety selection and disease management.

Speakers:

Variety Trials

David Benscher, Research Support Specialist
Small Grains Breeding & Genetics Project
Cornell University

Disease Management

Dr. Gary Bergstrom, Plant Pathologist
Plant Pathology and Plant-Microbe Biology
Cornell University

Pre-registration: We are asking anyone planning to attend to pre-register by calling 315-866-7920 or email herkimer@cornell.edu. Registration allows us to communicate any cancellations or changes in arrangements and to make sure there is a sufficient supply of educational materials.

Directions: From Fort Plain head south six miles on State Route 163, Vandusenville Road will be on the right, the farm immediately on the left. From the Cherry Valley intersection on State Route 20 go two miles north on County Road 32 and Vandusenville Road will be on your right, go one mile to the farm on the right. From Canajoharie go south three miles on State Route 10 and turn right on to State Route 163. Go three miles on State Route 163 and turn left on to Vandusenville Road and then an immediate left to the farm.
