

# New York State Economic Indicators Dashboard

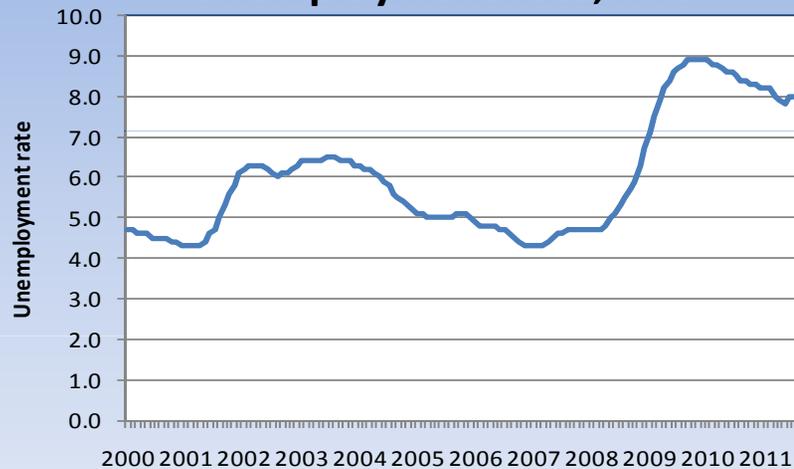

Private Sector Employment (000's)	
July 2011	7,169.4
June 2011	7,155.3
Change (Last Mo.)	14.1
July 2010	7,053.9
Change (Last Yr.)	115.5

**This Month:** Seasonally adjusted private sector employment rose by 14,100 this month, following a one-month gain of 18,400 jobs. The total is well below the 2008 peak but above the low point of the 2001 to 2003 recession. This continues a general growth trend that started in January 2010.

**About the Data:** Monthly private sector jobs data is provided by the NYS Dept. of Labor as part of the Current Employment Statistics survey which samples 18,000 New York State businesses each month.

**Seasonally Adjusted  
Unemployment Rate, NYS**

Source: NYS Dept. of Labor

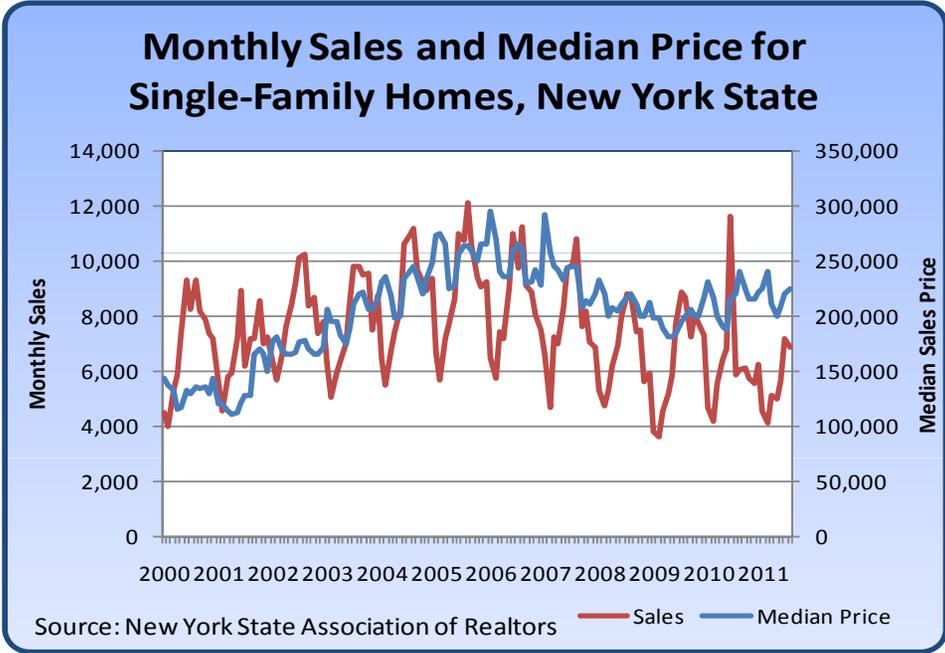

## Unemployment

July 2011	8.0
June 2011	8.0
Change (Last Mo.)	0.0
July 2010	8.5
Change (Last Yr.)	-0.5

**This Month:** Statewide unemployment rate held steady at 8.0% after sliding to 7.8% in May 2011 and wavering between 8.2% and 8.3% from October 2010 through February 2011. This is below the peak unemployment of 8.9% during September 2009 through January 2010.

**About the Data:** Monthly unemployment data is provided by the NYS Dept. of Labor as part of the Local Area Unemployment Statistics program. Statewide data is based on the monthly Current Population Survey conducted by the U.S. Bureau of the Census.

### Single Family Home Sales and Median Price, New York State

	Sales	Price
July 2011	6,836	\$225,000
June 2011	7,169	\$220,000
Change (Last Mo.)	-333	\$5,000
July 2010	5,882	\$220,000
Change (Last Yr.)	954	\$5,000

**This Month:** As expected, sales data in New York is highly seasonal but still reflects the nationwide economic condition and its impact on housing. Sales slid last month while the median price increased. Both sales and prices rose from last year.

**About the Data:** Monthly sales data is provided by the NYS Association of REALTORS. Data results from the monthly survey of realtors and reflects sales activity for existing single-family homes.

# New York State Economic Indicators Dashboard

	Permits	Value (000's)
July 2011	1,469	\$225,203
June 2011	3,281	\$396,860
Change (Last Mo.)	-1,812	-\$171,657
July 2010	1,753	\$276,013
Change (Last Yr.)	-284	-\$50,810

**This Month:** Permit activity and valuation continues below the period before the housing crunch and recession. The number of permits fell last month and is lower than July of last year. Valuation has also fallen compared to last month and the July 2010 level.

**About the Data:** Data on building permits for housing units is compiled by the U.S. Bureau of the Census as one of the nation’s leading economic indicators. The data is reported to the Census Bureau by individual local governments who issue building permits through a monthly survey.

**\*\* The figures for June 2008 represent an extreme anomaly in the data and reflect large multi-unit permit activity in New York City.**

# New York State Economic Indicators Dashboard

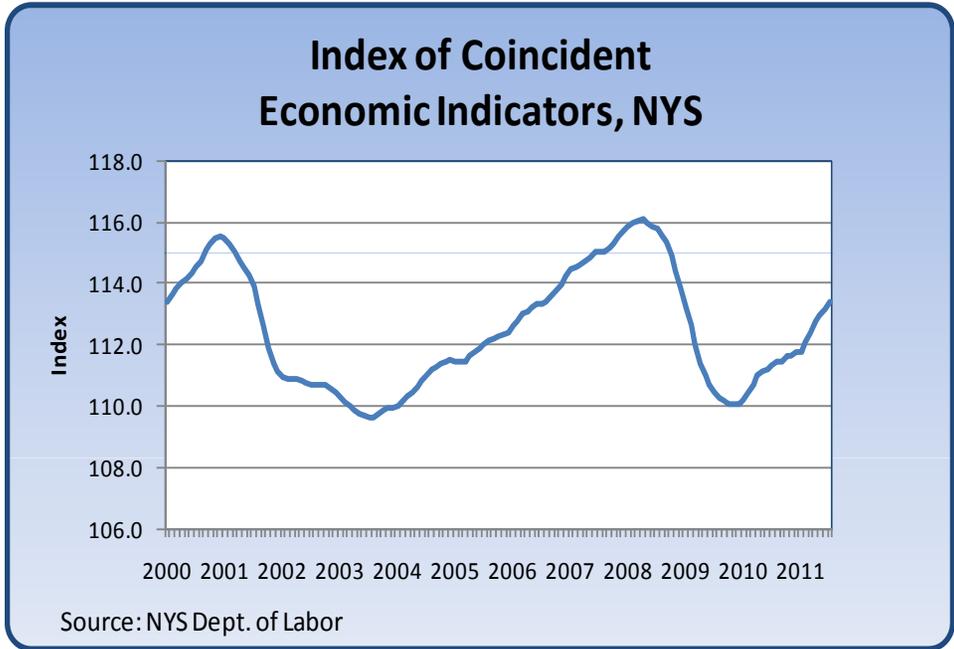

Consumer Confidence		
	NY	US
July 2011	63.0	63.7
July 2011	64.9	71.5
Change (Last Mo.)	-1.9	-7.8
July 2010	63.0	67.8
Change (Last Yr.)	0.0	-4.1

**This Month:** Consumer confidence for NYS slipped to 63.0 in July after waivering between 64.9 and 67.7 since October 2010. The national confidence level fell during the last month. There is still frequent variation in both NY and national data.

**About the Data:** New York consumer confidence is measured in a monthly survey by the Siena Research Institute by random telephone calls to 805 New York State residents over the age of 18. This index allows a direct comparison to the University of Michigan’s Consumer Sentiment index for the nation.

# New York State Economic Indicators Dashboard

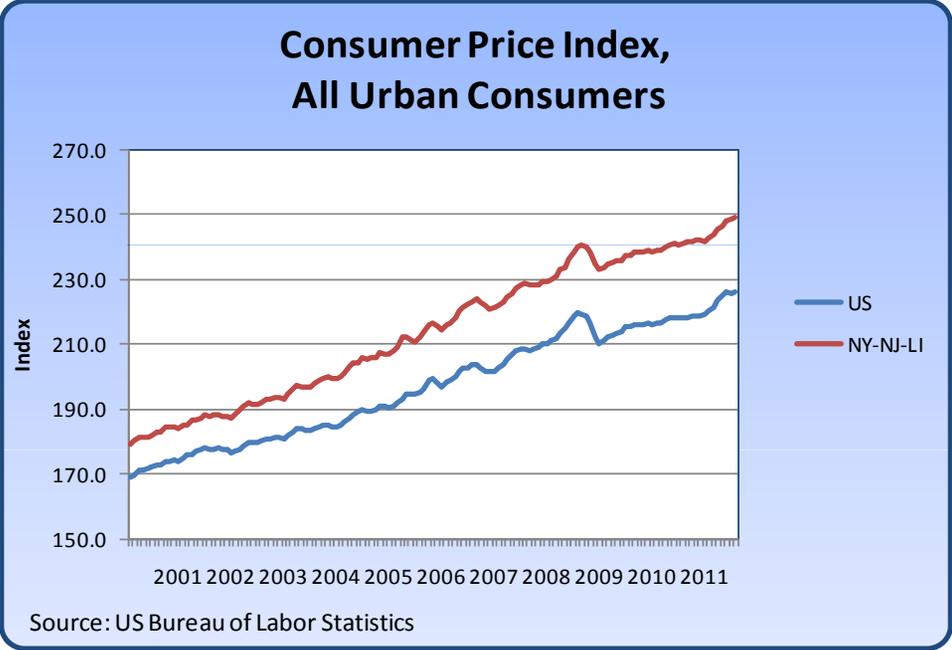

Index of Coincident Economic Indicators	
July 2011	113.4
June 2011	113.1
Change (Last Mo.)	0.2
July 2010	111.3
Change (Last Yr.)	2.1

**This Month:** The Index of Coincident Economic Indicators has shown six consecutive months of growth continuing a general upward trend that started in December 2009. The index is higher than it was in June 2010 but still well below the peak of April 2008.

**About the Data:** The ICEI is a monthly composite index of business cycle indicators produced by the NYS Dept. of Labor. It is designed to provide reliable and timely information about current economic conditions in New York State. The indicators include: private sector employment, the unemployment rate, average weekly hours of manufacturing workers, and sales tax collections.

### Consumer Price Index for All Urban Consumers (unadj.)

	NYS	US
July 2011	225.9	249.2
June 2011	225.7	248.5
Change (Last Mo.)	0.1	0.3
July 2010	218.0	241.1
Change (Last Yr.)	3.5	3.1

**This Month:** The CPI rose slightly for the US and the NY-NJ-LI metropolitan area last month. The annual rate of inflation, as of June, increased by 3.5% for the NY-NJ-LI area and 3.1% for the U.S. as a whole.

**About the Data:** The Consumer Price Index is prepared monthly by the U.S. Bureau of Labor Statistics. The CPI measures the cost of a market basket of goods and services purchased, in this case, by urban consumers. The major categories include: food and beverages, housing, apparel, transportation, medical care, recreation, education and communication, and other goods. The CPI is NOT available for local areas.

### Weekly Hours and Earnings for Production Workers, New York State

	Hours	Earnings
July 2011	40.5	\$750.87
June 2011	40.8	\$755.62
Change (Last Mo.)	-0.3	-4.8
July 2010	40.6	\$744.60
Change (Last Yr.)	-0.1	6.3

**This Month:** Average weekly hours for manufacturing production workers declined last month to 40.5 hours and their earnings fell to \$750.87 per week. Average weekly hours is up from the low point of 37.8 hours in January 2009. Earnings are higher than in July 2010.

**About the Data:** Weekly hours and earnings data comes from the Dept. of Labor's monthly Current Employment Survey of 18,000 employers. It measures the length of the work week, including overtime, for workers involved in the production of goods.

## Aggregate Personal Income and Wage and Salary Disbursements, New York State

### Aggregate Personal Income and Wage and Salary Disbursements (\$Millions), New York State

	Income	Disbursements
First Quarter 2011	\$963,688	\$520,731
Fourth Quarter 2010	\$947,246	\$516,063
Change (Last Qtr.)	\$16,442	\$4,668
First Quarter 2010	\$928,131	\$506,289
Change (Last Yr.)	\$35,557	\$14,442

**This Month:** The state's personal income and wage and salary disbursements rose for the third consecutive quarter. Both measures have shown general upward trends since substantial declines in the first quarter 2009. Aggregate personal income is at a record high.

**About the Data:** Aggregate personal income and wage and salary disbursements are prepared quarterly by the U.S. Bureau of Economic Analysis. Aggregate personal income is the income that is received by, or on behalf of, all the individuals who live in the state. Wage and salary disbursements consists of the monetary paid to employees before any deductions during the period, including corporate officers salaries and bonuses, commissions, pay-in-kind, incentive payments, and tips.

## Value of All New York Merchandise Exports

Source: WISER Trade Statistics

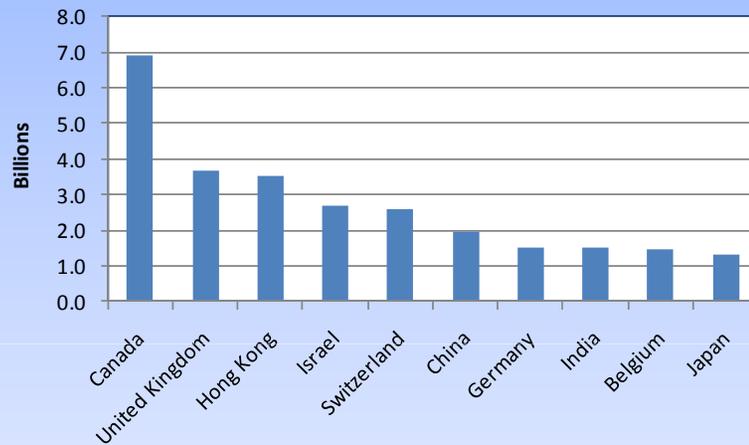

**This Month:** Though monthly data show dramatic fluctuations including an increase during June, the recent overall trend shows steady improvement over the sharp decline of 2008-09. Exports are 24% higher than in June 2010.

**About the Data:** Data are supplied by WISER Trade based on the U.S. Dept. of Commerce, Census Bureau, State Origin of Movement Series (OM). The OM series comes from documentation filed by the exporter with U.S. Customs. This series is defined as: 1) the state where the product began its journey to the point of export, or 2) the state of consolidation of shipments, or 3) the state of greatest value in the case of consolidation, or 4) the state of a foreign trade zone.

The OM state provides a close approximation to state of production for manufactured goods. It is not very reliable for certain agricultural and other non-manufactured goods because they can be credited to the major port states. For manufactured goods it may also capture the state of consolidation or the state of a broker or wholesaler.

**New York's Top 10 Trading Partners  
by Value of Merchandise Exports, June 2011 YTD**

Source: WISER Trade Statistics

**This Month:** Most major markets showed impressive year-to-date gains compared to June 2010, notably in Asia – with Hong Kong doubling. Exports to India and Switzerland also showed substantial growth.

Exports to Japan, Canada, China and several European nations, though still significant, are growing at slower rates.

**About the Data:** Data are supplied by WISER Trade based on the U.S. Dept. of Commerce, Census Bureau, State Origin of Movement Series (OM). The OM series comes from documentation filed by the exporter with U.S. Customs. This series is defined as: 1) the state where the product began its journey to the point of export, or 2) the state of consolidation of shipments, or 3) the state of greatest value in the case of consolidation, or 4) the state of a foreign trade zone.

The OM state provides a close approximation to state of production for manufactured goods. It is not very reliable for certain agricultural and other non-manufactured goods because they can be credited to the major port states. For manufactured goods it may also capture the state of consolidation or the state of a broker or wholesaler.

# New York State Economic Indicators Dashboard

**Current Year:** NYS export values by industry continue to reflect the diversity of NYS industrial sectors, and the significance of jewelry-related industries (precious gems and metals).

**About the Data:** Data are supplied by WISER Trade based on the U.S. Dept. of Commerce, Census Bureau, State Origin of Movement Series (OM). The OM series comes from documentation filed by the exporter with U.S. Customs. This series is defined as: 1) the state where the product began its journey to the point of export, or 2) the state of consolidation of shipments, or 3) the state of greatest value in the case of consolidation, or 4) the state of a foreign trade zone.

The OM state provides a close approximation to state of production for manufactured goods. It is not very reliable for certain agricultural and other non-manufactured goods because they can be credited to the major port states. For manufactured goods it may also capture the state of consolidation or the state of a broker or wholesaler.
