

## **New York Recycled Tire and Rubber Product Sellers – 2012**

**Disclaimer Notice:**

Empire State Development (ESD) serves as the repository for recycling market information for New York State. The intent of this list is to help users locate suppliers of products made with recycled rubber.

Neither the State of New York nor ESD shall be liable, financially or otherwise, to persons or firms for any losses, including loss of profit, indirect, special or consequential damages, or costs or expenses incurred in connection with the use of, or reliance upon, any information contained in, or derived from, this list of companies selling products made with recycled rubber.

While the ultimate goal of the list is to provide comprehensive, up-to-date information, the list may not be all-inclusive. Other suppliers almost certainly exist but have not been captured. To add, correct or update information, contact ESD Environmental Services Unit by emailing [environment@esd.ny.gov](mailto:environment@esd.ny.gov) or calling (518) 292-5340.

Being listed does not constitute an endorsement by ESD. The information in this list is neither an offer to sell, nor a solicitation of an offer to buy, recycled rubber products. ESD makes no guarantee that the information is correct; nor can it be held liable for any incorrect information presented. Price information has been specifically omitted to encourage interested buyers to negotiate directly with suppliers.

## New York Recycled Tire and Rubber Product Sellers – 2012

All States Materials Group (HQ)

325 Amherst Road

PO Box 91

Sunderland, MA 01375

(800) 343-9620

Local Contact: Mark Edsall, Technical Marketing (Syracuse, NY) (315) 238-5310

[medsall@asmg.com](mailto:medsall@asmg.com)

All States Materials Group's crumb rubber modified asphalt (CRMA) is a high performance asphalt binder for Pavement Preservation treatments including Seal Coats, Stress-Absorbing Membrane Interlayers, and hot mix asphalt (HMA) overlays. It is composed of performance graded asphalt blended with rubber from locally processed recycled tires and conforms to ASTM Specification D-6114 for Asphalt-Rubber Binder.

Alternative Rubber & Plastics, Inc.

200 Creekside Drive

Amherst, NY 14228

(888) 611-0220

(716) 691-2141

Fax (716) 691-5664

Contact: Jerry Fasolino, Jr. President

[jerry@altrubber.com](mailto:jerry@altrubber.com)

<http://www.altrubber.com/>

Alternative Rubber & Plastics, Inc. is an ISO 9001 certified distribution and development company with a strong focus on rubber, plastics and specialty polymers. Our product lines, many of which include recycled rubber and/or plastics, are recognized by our customers to be of the finest quality. Our sales teams are among the most innovative in the industry and we distinguish ourselves with cutting edge technical support.

A-Turf, Inc.

PO Box 157

Williamsville, NY 14231

(888) 777-6910

Fax (716) 204-0189

Contact: Jim Dobmeier

[jim@aturf.com](mailto:jim@aturf.com)

<http://www.aturf.com/>

A-Turf is a national athletic field builder. In the majority of our fields, about 3 pounds of recycled rubber is distributed into the field as a resilient, stable part of the surfacing system. On some of our fields, a resilient shock pad that is produced using recycled rubber particles bound together by urethane is placed under the carpet.

[www.EnvironmentalPavingSolutions.com](http://www.EnvironmentalPavingSolutions.com)

[www.flexi-pave.com](http://www.flexi-pave.com)

Environmental Paving Solutions, LLC is the certified installer of Flexi-Pave for Central and Western New York State. Flexi-Pave is a porous pavement manufactured from shredded passenger car tires. The material is mixed with high quality urethane on the job site, poured in place and finished with floats. No joints or expansion are needed because the product does not crack. The typical applications are an alternative to standard pavements. However, Flexi-Pave is such a remarkable product that new uses are being developed every day. The combination of being a porous pavement, sourcing our ingredients locally and by using recycled tires, of which approximately 70% are from NYS, places Flexi-Pave as a leader of environmentally-friendly products.

Hanover Specialties, Inc.

<http://www.vitriturf.com>

Vitriturf poured in place safety surfacing has been installed on thousands of projects in the recreation and construction industries since 1978. We manufacture all of our binders and shred our own rubber for use on our systems. The Vitriturf Playground System is comprised of a base mat consisting of 100% recycle tires mixed with a proprietary binder and a wearing course comprised of EPDM rubber and a proprietary binder. Vitriturf is available in many colors and graphic design features. Vitriturf has two manufacturing facilities, two satellite offices and installation crews strategically located throughout the United States. Every year the Vitriturf Systems utilize over 2 million pounds of recycled tires. We have dedicated research to finding and evaluating waste materials for use in its systems in order to eliminate as much waste as possible going to landfills.

Contact: Peter Kyle, President  
Email: [North.Brook.Farms@gmail.com](mailto:North.Brook.Farms@gmail.com)  
<http://www.northbrookfarms.com/>

North Brook Inc. is a diversified manufacturing company with a recycling focus. We have product offerings in the agricultural, equine, commercial/industrial and consumer markets. Our products range from an animal comfort "cow mattress" and horse arena footing, to alternative building materials and a unique rubber based playground surface. Heavily centered on using recycled materials, especially rubber, we strive to deliver simple, cost effective solutions for our markets. North Brook has produced the MOO2 Cow Mattress System for 22 years. The MOO2 uses recycled rubber products as a primary component in our system to provide a soft and resilient surface for Dairy Cows worldwide. "Comfortable Cows Make More Milk". North Brook Farms also manufactures the revolutionary TruStride equestrian footing surface. TruStride provides a dust free riding environment without the need to water. North Brook has created a variety of arena surfaces/arena amendments which include a unique blend using recycled rubber with the goal of providing a safer, more stable surface for the horse, as well as a healthier environment for both the horse and rider. In addition, the Saf-T-Soft ground rubber product for playgrounds, meets the new New York State OCFS requirements for day care providers. It is naturally colored, soft, always wire free and very cost effective. The Saf-T-Soft provides superior cushion with less material required to meet the ASTM F1292 Standards.

Premier Rubber sells recycled rubber – primarily buffings from retreading operations.

Re-Tread Products, Inc.

PO Box 261

Great Valley, NY 14741

(716) 244-8084

Contact: Tom Hansen

[rtp@retreadproducts.com](mailto:rtp@retreadproducts.com)

[www.retreadproducts.com](http://www.retreadproducts.com)

ReTread Products, Inc. (RTP) has developed a new building material made from recycled tires called the “Tire Log™”.

The patented Tire Log™ is a building material with unique benefits, combining the desirable characteristics of tire

materials with the structural integrity provided by RTP’s unique design. Due to its resistance to decay, along with the Tire Logs™ energy absorbing, “bends but doesn’t break” characteristics, the Tire Log™ has proven superior to conventional building materials for many construction applications. The Tire Log™ may have its most profound value in areas that are prone to earthquakes or other extreme forces such as wave action, explosions or vehicle impacts.
